# Site Conditions

Cabinco understand that hard working PTAs want to make sure that there are no hidden costs. To provide complete transparency, we have produced a full list of conditions that may cause additional costs however for your ease of reference the two main ones are;

1. Ground is level to within a tolerance of 50mm
2. The delivery vehicle can off-load no more than 20m from the point of construction.

A full list is issued with your order confirmation

# Building Regulations

Building regulations will not normally be required for your new Gazebo or Shelter provided that:

It is under 30sqm in size

It is under 4m in height

It is more than a metre away from any boundary

If in doubt – always phone your local office for confirmation

# Planning Permission

Planning Permission will not normally be required for your new Gazebo or Shelter however the rules are more variable than with Building Control so if in doubt, always phone your local office for confirmation, especially if putting near to a boundary or if your premises are in a protected area.

# Site Visits

To try to help you keep the costs down, we do not offer routine site visits prior to installation as this increases the costs for all. What we really need to know is that the site conditions are met and this can normally be checked by a caretaker or PTA member. If the site is good – then the advertised price is all you pay. Absolutely no hidden extras.

If you are not sure, then please ring 01600 719218 to discuss or email [info@cabinco.co.uk](mailto:info@cabinco.co.uk) and we will do our best to help.
